CORSO DI DIRITTO DELL'ECONOMIA

PROF. FABIANA DI PORTO

lunedì 9 aprile 2018, ore 12
Aula I-2, Dip. di Scienze dell'Economia

I big data nella logistica

Seminario con

Alessio Lorusso

Fondatore e Ceo di Roboze

Barese nella lista degli under 30 di Forbes 2018:

«Lorusso is the founder and CEO of Roboze, which builds 3D printers for large industrial manufacturers like GE and Airbus. Lorusso built his first 3D printer when he was only 17 years old, and in the two years since the company was founded, it's already generating over \$1.4 million in revenue per year - without raising capital from investors. Roboze's 3D printers, unlike traditional 3D printers, are beltless, which enables more precise 3D printing with lower maintenance costs. The company also makes its own proprietary materials for applications such as aerospace and medical products»
